

PRESS RELEASE

Light in weight, big on design – the new LIGA pivot door

The new pivot-door models of the LIGA shower enclosure range by Kermi offer a stylish, affordable hinge design for recessed, corner or 3-sided shower enclosures.

Plumbers will be impressed by the five-millimetre, high-transparency toughened safety glass, which makes the enclosures light to transport, and by the pre-assembled fittings which make for even easier and faster installation.

The new addition to the LIGA range also meets all requirements for use in a modern bathroom. With a standard height of 2 m, its slim wall profile is perfect for installing on tiles next to a wall panel. Custom-made wall fittings now enable flush installation to tile or wall-panel edge, offering high-quality design even in the lower price bracket.

Easy installation, an affordable price and highly transparent – the new LIGA pivot door is THE shower for every modern bathroom.

PRESS RELEASE

Stylishly lightweight. The new pivot doors in the LIGA shower enclosure series by Kermi: stylish, affordable hinge-design shower enclosures.

The wall hinge allows perfect line-in-line mounting to the tile edge.
